Feedback from Delegates

"Well run, kept to time, pre-recorded sessions were efficient use of time, question time was helpful"

"It worked and was convenient but a weekend only in person event would be good but optional"

"Would have preferred to be able to rate each talk immediately online at the finish of each talk and to have been able to ask questions or make comments after the talk had finished - the comment box disappeared too quickly at the end of each talk- I did like the option of flicking between talks and the option of listening to a talk once finished - I liked the online format and the ability to be at home while listening"

"I am a practice manager, so was disappointed there wasn't anything really specific to the business side of things, despite the conference being marketed to practice managers and administrative staff. I did enjoy the clinical education, but not all of it was relative to me."

"Brilliant thank you"

"Excellent speakers"

"Thank you for excellent meeting/ conference during this difficult times specially located in the distressed and distressful Victoria"

"Thank you for the format, the little breaks before and after the AGM so that other Sunday things could be attended to for 30 mins without feeling I had to spend six hours solidly on the platform. I had "attended" an eleven hour web conference a few weeks earlier and there were continuous concurrent sessions, very few reproduced for later, and a consequent anxiety not to miss anything compounded with cognitive fatigue of eleven continuous hours of lecturing on a Sunday. It was TOO long, and better spread over two days. Our one was far better timed at six hours, but I found some of the presentations were too short at just 15 minutes. I could have concentrated for 30 minutes on each just as happily."

"I think that a Users Manual would have been helpful. It took me quite a while to find my way around the online software."

"You guys did a great job for a small group on a minimal budget. I got quite a bit out of the meeting. Thanks."
