Radiesse® (+) Lidocaine injectable implant is intended for plastic and reconstructive surgery, including deep dermal and sub-dermal soft tissue augmentation of the facial area and dorsum of the hands in adults. Radiesse® (+) Lidocaine injectable implant is indicated for: the treatment of nasolabial folds, marionette lines and jawline; the augmentation of cheeks; hand augmentation to correct volume loss in the dorsum of the hands; the restoration and/or correction of the signs of fat or volume loss (lipoatrophy) in the facial area and for rejuvenation of the hands fat loss (lipoatrophy) in people with human immunodeficiency virus. Radiesse® (+) Lidocaine should not be used on patients: with known hypersensitivity to any of the components or severe allergies including history of anaphylaxis; prone to inflammatory skin conditions, hypertrophic scars/keloids or poor wound healing; with bleeding disorders or inflamed/infected skin; in the presence of foreign bodies/implants; in the epidermis, glabellar or nose; taking anti-coagulants; in pregnancy or lactation; others. Please review the Radiesse® (+) Lidocaine Instructions for Use before prescribing for full safety information. These are available from Merz Australia on 1800 268 820 or <https://merzaustralia.com.au/products/>. This medical device must be administered by a healthcare professional.
